AGRI-YIELD® Seed Guard Seed Treatment System

AGRI-YIELD Seed Guard is an all-in-one seed treatment system containing *fungicide*, *insecticide*, *inoculation* and *plant growth regulator (PGR)*. Seed Guard protects the young plant during the developmental stages leading to better stands, better plant growth and overall plant health. In return, growers gain higher yields and greater profitability.

AGRI-YIELD Seed Guard PLUS features the same all-in-one seed treatment system with the option to add in components including *nematicide*, *biological* and *SDS protection*. Available products include Aveo®, Terrasym®, Saltro® and ILeVO®.

AGRI-YIELD Seed Guard OVERWATCH is an overtreat system for **CORN** featuring Terrasym 450®. Terrasym delivers improved early season root development, resulting in enhanced nutrient uptake through the growing season and higher yields at harvest.
