

# SUGAR Complex

## Components

- Blackstrap molasses
- Humates
- Complex sugar

## Sugar Complex Soil Applications

- Increases microbial activity in zones where exudates, the signaling molecules, are released from roots
- Boosts nutrient release and uptake from soil
- Helps maintain a healthier and more productive microbial environment

## Sugar Complex Foliar Applications

- Increases sugars available for plant utilization
- Increases cellular function and stability, especially when under stress conditions
- Assists leaf absorption and efficiency of spray applications
- Provides more sugars available to support plant health and stability

## Applications

- In-Furrow
- Row Support 2x2 Starters
- Herbicide sprays
- Sidedress N
- Foliar nutrition
- Fungicides
- Fertigation

## Rate

**1-4 pints/acre**

Jar test to ensure compatibility.  
Use label guide for specific rate applications.

***“Cost effective  
supplement to increase  
the value of every  
application”***

***“From our soil to inside our plants,  
Sugar Complex works at all levels  
related to the process of increasing  
Yields”***
